## Float Glass

Float Glass is produced by pouring molten glass onto molten tin, resulting in flat glass with high quality and strength.

It's widely used in the construction industry for windows, doors and glazing. Float glass types are following.

01 Clear Float Glass

04 Grey Float Glass

02 Blue Float Glass

05 Brown Float Glass

03 Green Float Glass

06 Reflective Glass

## Our Services

Ghani Value Glass Limited is actively involved in the value addition of glass. With over 500 employee and production facility, spread over 21 acres, GVGL employs the latest technology in glass processing.

**GVGL is a certified processor of Guardian Glass, Emirates Glass & AGC Glass. The products and services are divided into five segments.**

**01** Mirror Division

**02** Architectural Division

**03** Home Appliances Division

**04** Bullet Resistant Glass (BRG)

**05** Decorative Glass Division

## Mirror Division

With a production capacity of over 55000MT per year, this division has the capability of making silver coated mirrors and aluminum coated mirrors. We are the only one in Pakistan to produce silver coated mirrors for high end applications and we produce aluminum mirrors with magnetron sputter coater which is the latest technology of the world. We also produce soft coated reflective glass via this magnetron sputter coater to give you the best quality products.

## Architectural Division

The Ghani Value Glass Limited has a facility to produce high quality tempered, laminated and double glazed glass.

GVGL has three tempering furnaces. New furnaces from Europe has been installed and can temper glass from 2.5mm - 19mm thickness with max size of 8ft x 12ft.

The only plant with robotic glass double glazing facility.

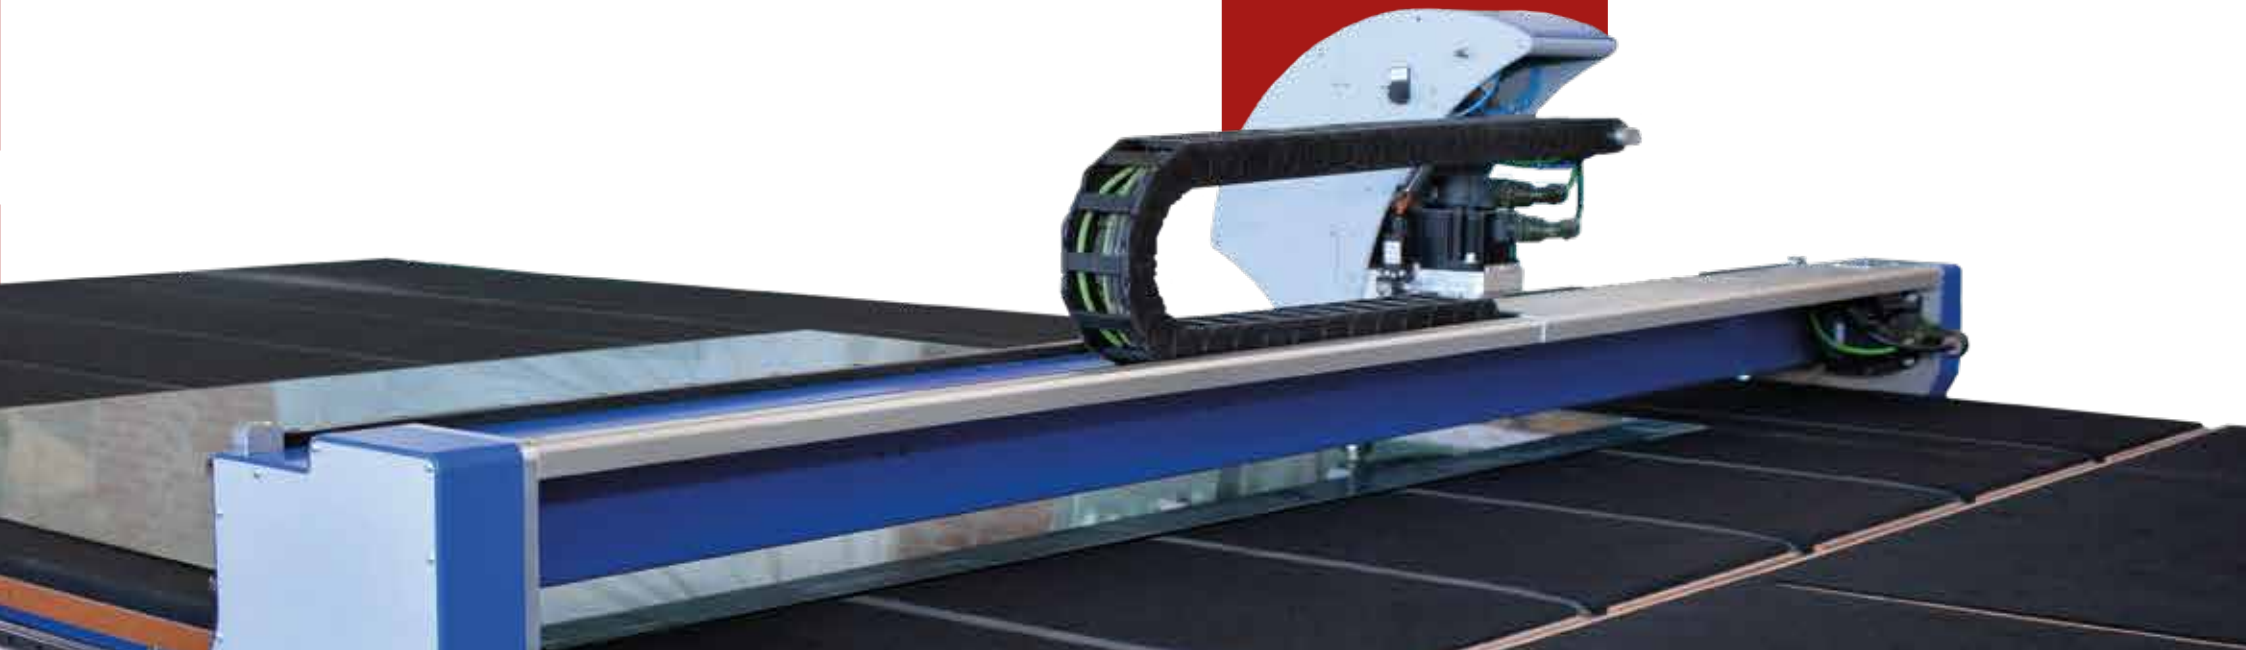

GVGL has best PVB lamination facility.

This furnace can process triple silver glazed glass

## CNC Cutting Machine

**Glass Cutting Capacity**  
with latest european CNC machine

30,000 Pcs/Day

# Glass Grinding Machine

## Glass Thickness

1.6 mm - 6 mm

## Glass Grinding Capacity

3500 Pcs/Day

# Double Edger Machine

**Processing Capacity**

16,000 Pcs/Day

## Tempering **Furnace**

Latest Tempering Furnace  
from Europe

### **Glass Thickness**

2.5mm - 19mm

### **Glass Tempering Capacity**

12,000 Shelves/Day

# Our Certification

## Home Appliance **Division**

Glass technologies are subject to constant radical changes, extending the applications of glazing in modern interiors and creating more exciting and useful appliances. Over recent years, sophisticated glass processing solutions have opened new doors to astonishing aesthetic designs, infinite shapes and even unforeseen functional possibilities.

# Digital Glass **Printing Machine**

## Printing Capacity

11,000 Pcs/Day

## Maximum Glass Size

5ft - 8ft

## Glass Thickness

2.5mm - 12mm

## Bullet Resistant Glass (BRG) **Division**

Bullet Resistant Glass (BRG) is made of multiple glass and interlayer films that have extreme shielding capability towards larger impacts. The different levels of bullet resistance glasses are able to shield various bullets from penetration and prevent the broken parts from injuring people. We are level six certified processor of BRG glass.

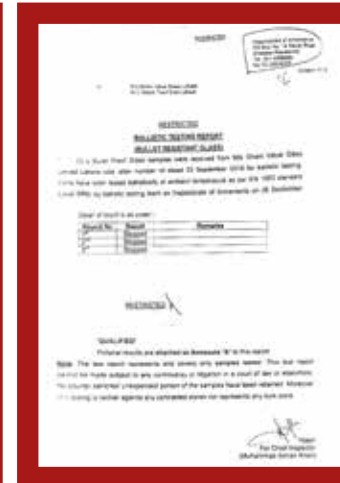

## Decorative Division

We produce back painted color glass for decorative applications, kitchen cabinets and partitions. Currently nine different colors are available white, off white, blue, yellow, beige, red, bloody red, grey and black. World famous, Italian paint "Fenzi" is used at very high temperature to paint this glass for its life time application.
